

Battery Charger Replacement Instructions

Please follow the steps below for replacing the battery charger board.

1. Switch all circuit breakers to OFF position
2. Disconnect all leads from the defective battery charger
3. Unscrew the four screws located on the aluminum plate
4. Replace the defective battery charger board with the new one.
5. Reconnect all leads as the original
6. Verify that the jumper J7 is open (cut) if the new battery charger is #1. See Picture 1 for J7 location
7. Verify that the jumper J7 is present (uncut) if the new battery charger is #2. See Picture 1 for J7 location
8. Switch all circuit breakers to ON position
9. Verify that display is reading both battery charger conditions.
